

Course offered for the Ph.D. program in Civil, Chemical and Environmental Engineering

Curriculum in Chemical, Material and Process Engineering

1. Title

Polymers in food and biomedical engineering

2. Course description

The course aims at providing knowledge and expertise on synthesis, development, design, and engineering of synthetic and natural polymers used in food and biomedical engineering.

The course will include the following topics:

- introduction on natural and synthetic polymers in food industry and bioengineering;
- synthesis of biopolymers (e. g. microbial synthesis) and synthetic polymers (e. g. click chemistry methodologies),
- techniques for the design and development of polymeric constructs (laboratory lesson);
- techniques for the characterization of polymers (laboratory lesson);
- engineering of biopolymers and synthetic polymers (classroom and laboratory lesson);
- applications of biopolymers in micro- and nanoencapsulation processes;
- applications of polymers in food packaging and regenerative medicine.

3. Course Organization

The course is organized in a single module with classroom and laboratory lessons.

4. Teachers

The teachers of the course will be Prof. Patrizia Perego and Dott. Pier Francesco Ferrari.

5. Duration and credits

The course (15 hours) will consist of 3 classroom lessons (2 hours each) and 3 laboratory lessons (3 hours each), for a total of 3 credits.

6. Activation mode and teaching period

The course will be held yearly if at least three students will be registered sending an e-mail to Dott. Pier Francesco Ferrari (pier.francesco.ferrari@unige.it). The course will be held at the end of January/beginning of February 2021. The exact dates of the lessons will be confirmed one month before the beginning of the course.

7. Deadline for registration

Registration to the course must be made before December 20th, 2020. Students are requested to inform the teacher by e-mail about their registration.

8. Final exam

The examination test will consist of a final project developed on a topic defined with the teachers.
